ISAP Joins Hands with leaders in their fields to Improve Quality of Life and Livelihood of Millions

Indian Society of Agribusiness Professionals (ISAP), which has impacted lives of more than half a million rural people through its interventions in agriculture, ICT, Skill Development, Entrepreneurship, Education, Renewable Energy, Water, Sanitation and Health throughout India has partnered with the most trusted leaders in the field of health, education, rural campaigners, solar, biogas, renewable energy, low cost integrated housing, outcome based skill training and mobile applications in agriculture which complements ISAPs strength and reach.

We together provide extraordinary reach and capability to target, design and implement projects throughout India in most transparent and cost effective ways. Intellectual, infrastructural and physical network of ours enables us to reach to almost any part of India and on field professional teams ensures excellent implementation. Deep & involved understanding of social and behavioural fabric of rural India and our network of rural opinion leaders help us design suitable projects for each region. *We connect you to tomorrow's consumers in socially responsible, sustainable and environment conscious ways.*

We can customize programs as per your CSR objectives while ongoing programs can be subscribed matching your needs. We have all required statutory permissions and licences like being registered under section 25 of companies law, FCRA registrations, Income tax exemption etc to take up CSR project compliant with Indian laws. We also have wide and deep network of collaborators and technology providers to be able to use most appropriate technology and cost effective implementation.

ISAP is empaneled for CSR in major corporations like Indian Oil, Monsanto etc and with Govt of India. ISAP is a leading partner with MANAGE, Hyderabad in implementing entrepreneur training. ISAP is a major participant of social development projects funded by governments, national and international donor and corporate agencies

Rural Relations (www.ruralrelations.com) is one of the most respected company with reliable and updated rural database, communication and innovative social development models. Rural Relations have clients like HUL, P&G, Tata Tea, Hutch among many more.

Gram Oorja (www.gramoorja.in) have done large projects in solar micro grid, solar lights, solar pumps and biogas with a philosophy that energy is an enabler and it must be available to all in sustainable, dependable and cost effective ways.

ISHP (www.ishpindia.org) is a network of health professional reaching to every nook & corner of India. ISHP runs its own hospital, on field specific health awareness camps, On call advisory on health , campaigns on sanitation, water treatment plants, mobile medical units services etc

Prashak Technology (www.prashak.com) is one of its kind low cost housing and township development company. It has its own patented technology to integrate house/ township with energy, water and waste management.

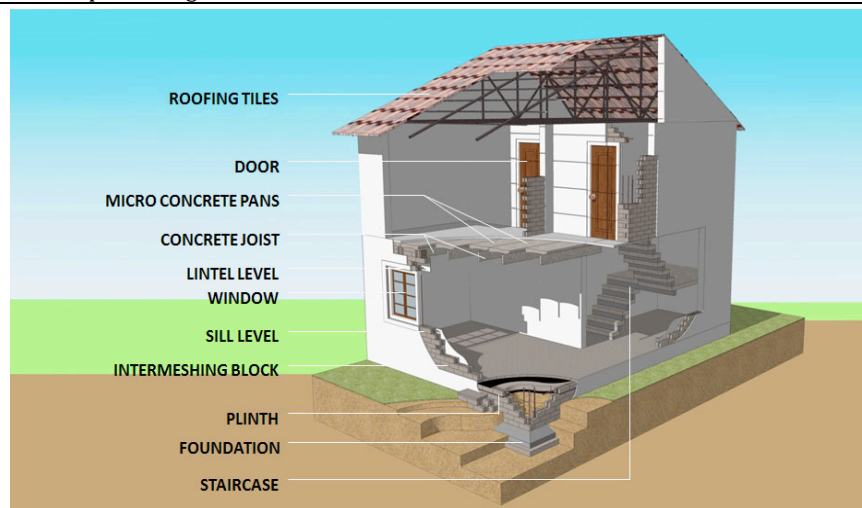

Yuvagram (www.yuvagram.in) is a specialized HR services company with probably the widest and deepest talent sourcing network of more than 15500 partners. Yuvagram has successfully skilled and placed large numbers in labour intensive industries like construction, security services, manufacturing, facility services, automotive, garments etc.

Low Cost housing for Economically Weaker Section :

ISAP community outreach and understanding of rural housing need is coupled with Prashak's unique & cutting edge technologies, more particularly the novel Habitech technology solution for construction structure and housing and innovative NATS technology solution for on-site sanitation management system, researched and developed at the reputed Asian Institute of Technology - an International Institute of higher learning based in Thailand. These innovative technology solutions enable creation of a wide range of innovative building components and construction structures integrated with on-site sanitation management system that are robust, environmentally friendly, disaster resilient, scalable, adaptable, energy efficient and highly affordable. Habitech - NivaraTrantra enables significant reduction in cost and pollution while building the clean, green and safe dwellings/structures, resulting in extraordinarily positive impact on social and environmental aspects.

We can take up projects where cluster of low cost houses are required. In case of rehabilitation due to major projects, housing for poor & vulnerable social groups, etc.

Low cost environment friendly house		
		<ul style="list-style-type: none"> • Innovative technology with multiple patents • Robust, environmentally friendly, disaster resilient,
Impact	Current	<ul style="list-style-type: none"> • Proventechnology • townships and individual houses constructed in Thailand
